I have been passionate about software since my university years, despite studying in a different department. I am proficient creating projects using Java, C#, Spring Boot, .Net and Javascript Technologies, which I actively showcase on my GitHub profile. I possess a strong understanding of Object-Oriented Programming (OOP), SOLID principles, Design Patterns and other essential concepts, applying them consistently in my projects. As a dedicated researcher and avid learner, I am confident that I can further enhance my skills by contributing to and learning from your company.

Projects

- **[Speech Master AI](#)**
This project is crafted with Spring Boot, ChatGPT API, Bootstrap and Javascript, designed to enhance your English speaking skills.
- **[Cafe Management System](#)**
This project is crafted with Spring Boot, Angular, PostgreSQL, HTML and CSS, designed to assist in the management of a cafe.
- **[Events Project](#)**
This project is crafted with C#, Bootstrap, MsSql, Authorization, designed as a site similar to [biletix.com](https://www.biletix.com).
- **[Patika Clone](#)**
This project is crafted with Java, Swing and PostgreSQL, designed as a clone of [Patika.com](https://www.patika.com) on desktop.
- **[Pizza Order](#)**
This project is crafted with Python and Qt Designer, designed for ordering pizza.

Certificates

[Backend Web Development Path With Intermediate Java](#)

Patika.Dev – Online
